Albatros®

Clifton St LOW O2 ESD SRC Electrostatic
Dissipative Shoes, Slip Resistant, Safety Boots

- **SLIP RESISTANT OUTSOLE** - The abrasion-resistant, cushioning DUO-PU sole is particularly characterized by its flexibility and slip resistance. The sole profile has wide flex grooves and differently designed profile elements for excellent grip on different floors, especially on industrial floors.
- **CUSHIONING MIDSOLE** - This soft PU midsole optimally cushions the high impacts of walking and combines perfect stability with flexibility.
- **EVA FOOTBED** - The anatomically shaped footbed made of soft EVA helps to protect the joints, muscles and bones with its shockabsorbing effect. An ergonomic longitudinal arch support provides optimal support for the foot when walking, while the dimpled forefoot area massages the front part of the foot with every step. The perforation in the ball area increases breathability. Everything for a comfortable fit.
