PUMA® Safety

Condor Black LOW S3L ESD FO SR Steel Toe
Electrostatic Dissipative Shoes, Fuel Oil resistant,
Slip Resistant, Safety Boots

- **REBOUND SOLE** - The 3-layered PU cushioning concept consisting of the EFFECT.FOAM® midsole, combined with the compact PU outsole and the evercushion pro® ESD footbed offers even more comfort and cushioning for a fatiguefree work experience. The side wall fins of the outsole work in harmony with the EFFECT.FOAM® to bring additional cushioning on the edges.
- **COMPACT PU OUTSOLE** - Due to its high material density, the slip resistant outsole (SRC) wears out less and prolongs thus the life of the shoes. The striking profile which is divided into different segments, offers maximum support and grip on uneven as well as wet and slippery surfaces. The wide cleats at the outer edge ensure a high level of stability
- **EFFECT FOAM®** - Progressive, incomparably comfortable and durable - that's the new EFFECT.FOAM® midsole. Excellent cushioning and energy return support the muscles, guarantee a remarkable joint relief and provide constant pleasant comfort. The special thing about EFFECT.FOAM® is the consistently high level of comfort, because the high-quality material remains powerful, for fatigue-free work and constant high performance.
- **evercushion® pro ESD** - The soft PU material of the evercushion® pro ESD insole offers a high cushioning during the whole footstep, therefore the pressure zones are relieved. The durable fabric cover and the perforated area at the forefoot ensure breathability and comfort. Electrostatic charges will be derived from the body.
- **FAP® - Flexible Anti Perforation** - The flexible anti-perforation midsole made of ceramic-coated fibers, reliably protects the feet completely from penetrating objects.

Care Instructions

Hand Wash
