### PUMA® Safety

SHIFT BLK/WHITE LOW S3S FO HRO SR Steel Toe, Slip Resistant, Safety Shoes

- **MOTION CORE SOLE** Heat resistant up to 300°C, the tread on the rubber outsole delivers perfect contact on a wide variety of surfaces – strong traction thanks to flatter studs for indoor use, but also self-cleaning with greater depth for outdoor suitability. The lateral elevation of the midsole in the heel area, which is frequently used in running, improves the stability of heel contact.
- **CUSHIONING MIDSOLE** A soft PU midsole optimally cushions the high forces with every step and delivers the ideal combination of stability and flexibility.
- **FAP® LITE - FLEXIBLE ANTI-PERFORATION** The latest generation of metal-free antiperforation: • 50% lighter\* • excellent flexibility • improved cushioning and pressure elasticity • breathability and sweat absorption for a cooling effect
- **EVERCUSHION® EASY** The combination of breathable, open-cell foam technology and particularly moistureabsorbing upper material effectively transports perspiration away from the feet and keeps them pleasantly dry. The soft memory foam of the evercushion® EASY footbed adapts perfectly to the shape of the foot and exhibits truly outstanding cushioning effects – for the softest of touches with every step.
